DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/30/2010 has been entered.

Response to Amendment

The amendment filed on 7/30/2010 has been entered.

Allowable Subject Matter

Claims 1-47 are allowed. The following is an examiner's statement of reasons for allowance:

Regarding claims 1-4, the prior art of record does not teach or suggest the invention of a display device having a first transistor including a first gate electrode which has a convex curved surface from an edge to an opposite edge, wherein the thickness of the first gate electrode decreases continuously from a center portion of the first gate electrode to an edge of the first gate electrode, along with other claimed limitations. Claims 5-11 are allowed due to claim dependency.

Regarding claims 12 and 13, the prior art of record does not teach or suggest the invention of a method for fabricating a display device including a step of forming a first conductive film over a photocatalyst, wherein the thickness of the first gate electrode decreases continuously from a center portion of the first gate electrode to an edge of the first gate electrode, along with other claimed limitations. Claims 14-17, 42, 43, and 47 are allowed due to claim dependency.

Regarding claims 18 and 19, the prior art of record does not teach or suggest the invention of a method for fabricating a display device including a step of forming a photocatalyst over a substrate, and forming a columnar conductive film by discharging droplets containing a conductor on top of each other, wherein the thickness of the first gate electrode decreases continuously from a center portion of the first gate electrode to an edge of the first gate electrode, along with other claimed limitations. Claims 20 and 26-30 are allowed due to claim dependency.

Regarding claims 21, 22, 25, 31, 36, and 37, the prior art of record does not teach or suggest the invention of a method for fabricating a display device including a step of forming a photocatalyst over a substrate, wherein the thickness of the first gate electrode decreases continuously from a center portion of the first gate electrode to an edge of the first gate electrode, along with other claimed limitations. Claims 23, 24, 32-35, and 38-41 are allowed due to claim dependency.

Regarding claim 44, the prior art of record does not teach or suggest the invention of a method for fabricating a display device including a step of preparing a treatment system including a first treatment chamber for droplet discharge and a second treatment chamber for planarization, forming a columnar conductive film having side portions covered with an insulating film over an object by a droplet discharge method in the first treatment chamber, and planarizing a top surface of the columnar conductive film and the insulating film in the second treatment chamber by a means for spraying a gas, along with other claimed limitations. Claims 45 and 46 are allowed due to claim dependency.

Further, note the applicant's response filed on 7/30/2010.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
